Nifty opened higher but was unable to sustain the opening gains and momentum on the downside intensified as the day progressed which dragged nifty to close marginally in green. On the daily chart, we are observing an inside day formation which gives small clue that it a breather of current down move. In coming trading session if nifty for first hour trades below 16620level then it may test 16580–16470 levels. On the upside, 16800–16900 levels may act as resistance for the day.

We maintain our stance that the prices have closed well below the 16800 level, we are of the opinion one needs to adopt cautious approach at current level.
