Nifty, opened up with a gap traded in a narrow range with positive bias to close in green. On the daily chart, we are observing an upward gap area in the range of 17644 to 17671. Normally, upward gap area does act as support for the prices. In coming trading session if nifty trades above 17780level then it is likely to test 17820 - 17900 levels. On the downside 17609 -17490 levels may act as support for the day.

Since prices are trading above the 200-days SMA (17403) one needs to adopt cautiously positive approach at current level.
