Nifty opened on a subdued note traded and momentum on the downside intensified as the day progressed which led the indices to close in red. On the daily chart, we are observing two consecutive bear candle below the 50-daySMA (12112). We maintain our stance that 12112 remains crucial resistance. Any close above 12112 would propel Nifty to test 12180 – 12250 levels in couple of days. On the downside, 11980 -11930 levels may act as support for the day. We reiterate our view that one needs to adopt cautious approach at current levels and wait for more confirmation of trend reversal. However, Stock activity is likely to continue.
