Nifty opened on a subdued note and momentum on the upside intensified as the day progressed which led Nifty to close in green. On the daily chart after six days of consolidation we are witnessing a positive candle with higher volumes. This suggests that momentum on the upside is likely to continue. In coming trading session if Nifty for first hour trades above 17532 level then it may test 17620 - 17750 levels. On the downside, 17420 - 17350 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
