Nifty opened up with a gap and traded in a narrow range with positive bias to close in green. The upward gap area is in the range of 16987 to 17175. Normally, upward gaps do act as support for the prices. On the daily chart, prices have closed above the falling 50-days SMA (17261). Hence a consolidation from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17344 levels then it may test 17450 – 17530 levels. On the downside, 17200 - 17100 levels may act as support for the day.

Since, on the daily chart, prices have formed an upward gap area with higher volumes and even the momentum oscillator RSI is gaining momentum. This suggests that market has formed an intermediate bottom at 15671 level and this markets becomes a buy on dips market. Hence, one needs to adopt positive approach at current level.
