Market Technical Outlook

On 21/01/2019 markets opened higher traded with positive bias throughout the day to close in green. On the sartorial front Energy, Oil & Gas and Teck ended on the gainers side whereas Realty, Auto and Telecom ended on the losing side. The advance decline ratio was in favour of declining counter (Advances= 938 Declines= 1657).

Pattern Formation: On the Daily Chart prices breached the 19th Dec 2018 high (10985) and has close below it and has formed a narrow range body formation.

Outlook: The current price action suggests that markets are circumspect at current level. In coming trading session if Nifty trades above 11000 level then it is likely to test 11020 – 11080 levels. On the downside, 10900 – 10861 levels may act as support for the day.

We still maintain our stance that nifty has closed well above 10880 levels there is high probability that nifty may test 11111 – 11265 in current month .
