Nifty opened on a subdued note traded in a narrow range throughout the day with mild negative bias to close in red. On the daily chart we are observing a positive candle above the 21-day SMA (17175). This suggests that upside momentum is likely to continue. In coming trading session if Nifty for first hour trades above 17600 level then it may test 17700 - 17800 levels. On the downside, 17450 - 17360 levels.

We still continue to maintain our stance that stock specific activity is likely to continue.
