Nifty opened higher made all-time high and witness some profit booking to close marginally in green. On the daily chart we are observing three narrow range body formations with higher highs this suggests upside momentum. In coming trading session if nifty for first hour trades above 16712 level then it may test 16780 - 16810 levels. On the downside, 16510–16450 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
