Nifty opened higher but was unable to sustain the opening gains and momentum on the downside intensified as the day progressed. However, in the final hour of the trade witness some recover from day's low to close in red. On the daily chart we are observing that prices came close to 21-daySMA (17448) by making a low of 17576. At present, 17448 is immediate support for the prices. In coming trading session if Nifty for first hour trades above 17810 level then it may test 17900 – 18000 levels. On the downside, 17650 - 17550 levels.

We still continue to maintain our stance that stock specific activity is likely to continue.
