Birlasoft Vs Nifty 50

Abhishek Jain abhishek.jain@arihantcapital.com 022 67114851

Jyoti Singh jyoti.singh@arihantcapital.com 022 67114834 Birlasoft(BSFOT) reported consolidated revenue slightly slightly below our estimates; with declines across key segments, though EBIT margin improved sequentially, and PAT remained below estimates amid higher finance costs. Birlasoft reported Q4FY25 revenues of USD 152.20 mn down 5.3% QoQ/ 7.1% YoY versus (Our estimate of USD 160 Mn). Constant currency (CC) revenue growth is down by 5.3% QoQ/ 6.9%YoY. The company has reported consolidated revenue of INR 13,169 Mn, -3.4% YoY/ -3.4% QoQ in Q4FY25 slightly below (Our estimate of INR 13,875 Mn). Growth led by Manufacturing (-5.1%QoQ/-9.1% YoY) Energy & utility (+10.3% YoY/3.8% QoQ) Life science (-5.3% QoQ/-14.3% YoY) while BFSI (+10.0% YoY/-3.5% QoQ). Consolidated EBIT stood at INR 1,519 Mn slightly below (Our estimate of INR 1530 Mn) led by lower other expense & Depreciation. EBIT margin came at 11.5% above estimate of 11.03% increased by 111 bps QoQ/down by 318 bps. Consolidated PAT stood at INR 1,221 Mn, slightly below (Our estimate of INR 1265 Mn) up 4.4% QoQ/down 32.2% YoY led by higher finance cost (increased by 35% YoY) and lower other income. The order booking for Q4FY25, was at US \$112 mn in TCV (Grew 75% QoQ/ +4.67% YoY) and renewals of \$124Mn. Active Client Count at 254 in Q4FY25 (down from 265 in Q3FY25, with the number of \$5M+ clients remained same from 27 in Q3FY25 to 27 in Q4FY25) and the number of \$1M+ clients declined from 85 in Q3FY25 to 80 in Q4FY25. DSO up by 1 Days to 54 Days in Q4FY25. LTM attrition up by 10bps QoQ at 12.8%; Headcount down by 195 to 11,930 in total. IT Utilization decline by 80bps QoQ; Offshore revenue 50.3% against 51% in Q3FY25. The company recommended final dividend of INR 4 per share. Mr. Manjunath Kygonahally added the role of Global Head - Strategic Growth Initiatives alongside his CEO role RoW. Focus is on profitable business growth internationally.

Structural changes in ERP Segments: ERP remained a drag in FY25 with a YoY decline of $^{\circ}6.4\%$. Birlasoft serves mostly Tier 2 and lower Tier 1 clients, who have been slower to adopt cloud upgrades like SAP S/4HANA or Oracle Fusion. The company acknowledged two years of degrowth and is initiating structural changes to revive ERP, including leadership hiring and capability enhancement.

Impact on financial largely led by Manufacturing segments: Manufacturing accounts for over USD 300 mn of revenue and faced broad-based weakness due to macro uncertainties, tariff concerns, and client-side insourcing. This caused ramp-downs and delays in project starts. While no client was lost, spending remained cautious, with recovery expected from Q2 FY26 as new multi-year deals ramp up.

Margins improvement led by currency benefits: Q4 margins improved by 119 bps QoQ to 13.2%, helped by ~200 bps in one-offs like reduced senior-level variable pay, leave encashment, and INR depreciation. However, 50% of these tailwinds are non-recurring. The comapny intends to hold margins flat in FY26, focusing on winning deals and regaining growth before margin uplift resumes in FY27.

Valuations

Birlasoft reported a disappointing performance in Q4FY25, primarily due to high furloughs in H2FY25 and tarrif impact on manufacturing sector as the company major revenue coming from the manufacture sector. Manufacturing continues to be a drag on performance, but the company remains committed to its investments and is not considering cutbacks, despite temporary impacts on margins. The outlook for Q2FY26 remains positive, contingent on macroeconomic trends. Margins benefited temporarily from reduced employee costs and lower variable pay, though this is expected to reverse in subsequent quarters. While margins are expected to remain flat around 13% in the short term, long-term margin expansion is anticipated, especially post-FY27, once tariff-related headwinds subside. New leadership is expected to drive both organic and inorganic growth, with current investments slightly diluting margins but paving the way for sustainable margin improvement in the future. Our valuation, based on a PE of 21x FY28E EPS of ~INR 23.1, yields a target price of INR 484 per share. We downgrade our rating to an Accumulate.

Brilasoft Q4FY25 Concall Highlights

Business Performance

RoW region is performing well, supported by a large deal, which is significant considering the size of the overall business. Although there were considerable furloughs in Q3 and Q4, no customers were lost. The company closed or ramped down certain projects but continues to support those clients and remains engaged for future opportunities.

Deal Pipeline & Wins

The company witnessed a strong spike in deal closures in Q3, followed by continued momentum in Q4, which saw a 4% QoQ growth. About 75% of the QoQ growth came from new logos and new deals, with the TCV primarily derived from these new wins. The UK region contributed through secure multi-client deals. On a global scale, advanced AI and agentic AI capabilities were successfully delivered to a key customer operating in the APAC region.

Market & Demand Environment

The demand environment remains challenging due to ongoing uncertainties in trade and tariffs. There is also a trend toward insourcing, although some recovery began in Q2 FY25. Several accounts saw ramp-downs, particularly in discretionary spending segments. Despite this, the energy sector grew by 1%, and operational efficiency contributed positively across other segments.

Currency movement

A favorable currency movement added a 200 bps benefit, which led to a 190 bps QoQ expansion in EBITDA margins, reflecting improved financial discipline. Revenue in FY25 is expected to be relatively flat, with margins contracting by approximately 3%. The company has made substantial investments in infrastructure and business acquisitions, which are expected to yield benefits over time. Additionally, a one-time insurance claim of INR 250.9 million contributed to a 24% YoY growth and strong cash generation. The company maintains a healthy DSO and remains debt-free.

Offshore/Onsite Revenue Mix

The proportion of offshore revenue declined from 54.2% in Q3 FY25 to 51.0%, a drop of 3.2%, largely due to a shift in discretionary demand towards onsite delivery. However, this trend is expected to normalize in the coming quarters, with offshore consolidation likely to stabilize by Q2.

Revenue Trends

In manufacturing and life sciences, some projects reached closure, leading to short-term revenue pressure. Q1 FY26 is expected to be muted, but recovery is anticipated by Q2 FY26. The company is focusing on improving efficiency and pushing milestone-based payments to support cash flow. While three out of the last four quarters experienced revenue declines due to project ramp-downs, Q2FY26 is projected to mark a turning point. Management is confident that FY26 performance will be stronger than FY25, supported by improved deal wins and execution.

Margins

Margins benefited temporarily from reduced employee costs and lower variable pay, though this is expected to reverse in subsequent quarters. While margins are expected to remain flat around 13% in the short term, long-term margin expansion is anticipated, especially post-FY27, once tariff-related headwinds subside. New leadership is expected to drive both organic and inorganic growth, with current investments slightly diluting margins but paving the way for sustainable margin improvement in the future.

BESI and MedTeck

The BFSI segment, including BSOFT, cards, payments, and asset management, showed muted performance after nine quarters of growth. Historically, BSOFT has performed well when banks faced challenges. In MedTech, cautious client spending due to tariffs affected manufacturing business performance. However, growth is expected in the coming quarters, and the company was recently selected as a preferred partner by leading med tech companies.

FY23-FY26 Outlook

The company experienced good growth during FY23–FY24, but FY25 has been relatively flat due to lack of operating leverage and ongoing investments. Several leadership changes and strategic initiatives are in place, though not all investments are yielding results yet. Manufacturing continues to be a drag on performance, but the company remains committed to its investments and is not considering cutbacks, despite temporary impacts on margins. The outlook for Q2 FY26 remains positive, contingent on macroeconomic trends.

Deal Momentum & Pipeline

In Q4, total deal wins amounted to \$236 million, with \$112 million from new deals. Several high-value technology deals were closed, including one worth \$30–40 million and another between \$20–30 million. Although Q1 FY26 may see slower TCV, the pipeline suggests a better overall performance compared to FY25. With focus on agentic Al and strategic account targeting, the company expects margin recovery and improved deal momentum in later quarters.

Business Model Transition

Currently, 70% of the company's revenue comes from discretionary projects. The goal is to rebalance this to a 50-50 split between discretionary and annuity-based business. Efforts are already underway to secure more annuity work, and progress has been noted in the initial months of FY26.

Booking

Manufacturing bookings stood at \$160 million and MedTech at \$100 million. However, due to tariff-related headwinds and upcoming project closures (notably on June 1st), Q1 FY26 might show slight negative growth. New project wins are expected to start contributing to revenue from Q2 FY26 onward.

Macro & Client Update

The U.S. accounts for 87% of total business, and greater clarity on market trends is expected in the next few months. The company is actively managing 50–60 clients, many of whom are smaller and need stabilization. U.S.-China tariffs continue to create cautious optimism, and the situation is being closely monitored for potential impact on larger deals involving China.

ERP Segment & Leadership

The ERP segment was a significant drag on FY25 performance, contributing to a 6.4% YoY decline. The company is now focusing on Tier 2 accounts, expecting gradual improvement in Tier 3 clients. The ERP business is undergoing structural changes and transformation, initiated two years ago. Leadership gaps are being addressed with strategic hires. Several deals are in the pipeline, with final announcements expected in June or July. The infrastructure business remains margin-dilutive at present.

Q1FY26 Outlook

Currency benefits of around 50bps are expected in Q1 FY26, but revenue is likely to remain soft. Senior leadership variable pay has been reduced, with 50% categorized as one-off. The company remains focused on converting deals and expects a better performance in Q2.

Client Matrix

The client base currently includes 200–250 accounts. Some accounts have been terminated, while others are being re-engaged. The company aims to restart business with about 150 logos and address delivery challenges in non-core regions. Manufacturing remains the most affected vertical, while BFSI is expected to recover in the near future.

FY25 Performance & ERP Focus

FY25 performance was dragged down by a weak ERP segment, showing a 6.4% YoY decline. Tier 2 account performance was slightly weaker, but improvement is expected over time. The company is placing major focus on the ERP business and has undergone structural changes over the past two years to turn this around.

Deal Strategy & Investment

Rather than focusing solely on cost take-outs, the company is pursuing deals with long-term growth potential. Some key deals have been secured, while others are in progress, though not yet confirmed. The strategy includes investment in capabilities, leadership, and customer engagement.

Dividend Polic

The company maintains a dividend payout range of 25–35%, while ensuring adequate cash reserves for business reinvestment. Strong cash generation supports both shareholder returns and strategic investments.

Arihant Capital Markets Ltd.

1011, Solitaire Corporate park, Building No. 10, 1st Floor, Andheri Ghatkopar Link Road, Chakala, Andheri (E) Tel. 022-42254800

Disclaimer: This disclosure statement is provided in compliance with the SEBI Research Analyst Regulations, 2014. Arihant Capital Markets Limited (ACML) is a registered stockbroker, merchant banker, and research analyst under SEBI, and is also a Point of Presence with the Pension Fund Regulatory and Development Authority (PFRDA). ACML is registered with SEBI with Research Analyst Registration Number INH000002764, Stock Broker Registration Number INZ000180939, and is a Trading Member with NSE, BSE, MCX, NCDEX, and a Depository Participant with CDSL and NSDL.

ACML and its associates may have business relationships, including investment banking, with companies covered by its Investment Research Department. The analysts of ACML, and their associates, are prohibited from holding a financial interest in securities or derivatives of companies they cover, though they may hold stock in the companies they analyze. The recommendations provided by ACML's research team are based on technical and derivative analysis and may differ from fundamental research reports.

ACML confirms that neither it nor its associates have a financial interest or material conflict concerning the companies covered in the research report at the time of publication. Furthermore, ACML, its analysts, and their relatives have no ownership greater than 1% in the subject companies as of the month prior to publication. ACML guarantees that the compensation for its research analysts is not influenced by specific securities or transactions.

ACML affirms that neither the analyst nor the company has served as an officer, director, employee, or engaged in market-making activities for any of the subject companies. Additionally, the research report does not reflect any conflict of interest and is not influenced by specific recommendations made. Neither ACML nor its analysts have received compensation for investment banking or brokerage services from the subject companies in the last 12 months.

The views expressed in this report are those of the analysts and are independent of the proprietary trading desk of ACML, which operates separately to maintain an unbiased stance. Analysts comply with SEBI Regulations when offering recommendations or opinions through public media. The report is intended for informational purposes only and is not an offer or solicitation for the purchase or sale of securities.

This report, which is confidential, may not be reproduced or shared without written consent from ACML. It is based on publicly available data believed to be reliable but has not been independently verified, and no guarantees are made about its accuracy. All opinions and information contained in the report are subject to change without notice. ACML disclaims liability for any losses resulting from reliance on this report. The report does not constitute an offer to buy or sell securities, and ACML is not responsible for the risks involved in investments. ACML and its affiliates may have positions in the securities discussed or hold other financial interests in them.

The distribution of this report in certain jurisdictions may be restricted by law, and the report is not intended for distribution where it would violate local laws. Investors are advised to consider their financial position, risk tolerance, and investment objectives before engaging in transactions, particularly in high-risk financial products such as derivatives.

ACML reserves the right to modify this disclosure statement without prior notice. The report has been prepared using publicly available information and internally developed data, though ACML does not guarantee its completeness or accuracy. Historical price data for securities can be accessed via official exchanges like NSE or BSE. ACML and its affiliates may conduct proprietary transactions or investment banking services for the companies mentioned in this report. In compliance with SEBI regulations, ACML maintains comprehensive records of research reports, recommendations, and the rationale for those recommendations, which are preserved for at least five years. An annual compliance audit is conducted by a member of the ICAI or ICSI to ensure adherence to applicable regulations. This report is issued in accordance with applicable SEBI regulations and does not guarantee future performance or returns.
