#### **Market Technical Outlook**

The Nifty opened lower traded with negative bias throughout the day to close in red. On the daily chart, we are observing that prices have closed below 10-daysSMA (23337) which gives small clue, that selling may continue. In coming trading session if nifty trades above 23202 level then it may test 23270 – 23350 levels. On the downside, 23050 – 22970 levels may act as support for the day.

Broadly, looking at the current price action we are of the opinion that nifty has good demand zone of 22830 – 23000 from where bounce cannot be ruled out. Hence, one needs to adopt cautious approach at current level.
