Market Technical Outlook

The Nifty opened higher, traded in a narrow range with positive bias to close in green. On the daily chart, we are observing that prices for two consecutive trading session has closed well above the 10-day SMA (23122). This suggests that a pullback rally is in offing. In coming trading session if nifty trades above 23275 the it may test 23380 – 23460 levels. On the downside, 23150 - 23078 levels may act as support for the day.

We maintain our stance that looking at the current price action it is evident that a pullback rally is in offing. Hence, one needs to adopt cautiously positive approach at current level.
