The Nifty opened on a subdued note traded with extreme volatility but finally managed to close with marginal losses. On the daily chart, we are observing that a high wave "Doji" which has close above the 10-day SMA (23166) & 20-days SMA (23267). This suggests indecisiveness prevailing at current level. In coming trading session if nifty trades above 23540 the it may test 23620 – 23710 levels. On the downside, 23370 -23290 levels may act as support for the day.

We maintain our stance that looking at the current price action it is evident that a pullback rally may be extended. Hence, one needs to adopt cautiously positive approach at current level.
