Market Technical Outlook

The Nifty opened down with a gap and momentum on the downside intensified as the day progressed which led nifty to close in red. On the daily chart, we are observing a strong bear candle which has closed near days' low. This suggests weakness. In coming trading session if nifty trades below 22100 levels then it is likely to test 22000 – 21880. On the upside, 22250 – 22340 levels may act as support for the day.

The current price action is making a lower - lows formations, this is sign of weakness. Hence, one need to adopt cautious approach at current level.
