### Market Technical Outlook

The Nifty opened higher but could not sustain the opening gains and selling during the day led nifty to close in red. On the daily chart, we are observing that prices have faced resistance at the falling 50-days SMA (23765) and has close well below it. In coming trading session if nifty trades above 23650 the it may test 23710 - 23820 levels. On the downside, 23510 -23400 levels may act as support for the day.

Broadly, looking at the current price action it is evident that a pullback of current up move cannot be ruled out. However, at lower level ie 23500 – 23400 buy is likely to emerge. Hence, one needs to adopt cautiously positive approach at current level.
