Market Technical Outlook

The Nifty opened lower but recovered some of its losses during the day to close in red. On the daily chart, we are observing a narrow range body formation which suggests indecisiveness prevailing at current level. In coming trading session if nifty trades above 23306 level then it may test 23360 – 23450 levels. On the downside, 23165 – 23040 levels may act as support for the day.

We maintain our stance that nifty has good demand zone of 22830 - 23000 from where bounce cannot be ruled out. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
