## Market Technical Outlook

The Nifty opened higher, initial witness selling pressure but recovered majority of its losses during the day to close in red. On the daily chart, we are observing a candlestick pattern that resembles a bullish “Hammer”. The said pattern will get activated once nifty trades and close above 23751. In such scenario nifty may test 23820 – 23910 levels. On the downside 23570 – 23480 levels may act as support for the day.

Since prices are still trading below the rising 200-days SMA (23924), one needs to adopt cautious approach at current level.
