Market Technical Outlook

The Nifty opened on a subdued note, but selling emerge in the later half of the session to close in red. On the daily chart, we are observing prices have close below the 10-days SMA (24316). This suggests that downside is likely to continue. Further, we still continue to maintain our view that RSI on the daily chart is giving a negative divergence which sign of weakness. In coming trading session if nifty trades below 24230 level then it may test 24180 - 24070 levels. On the upside, 24320 - 24410 levels may act as resistance for the day.

Broadly, looking at the RSI negative divergence we are of the opinion that there is a possibility of minor correction or a consolidation from current levels. Hence one needs to adopt cautiously positive approach at current level. However, stock specific activity is likely to continue.
