Market Technical Outlook

The Nifty opened higher but traded within a range with stocks specific move. On the daily chart, we are observing “Narrow range body formation”, which indicates we can see some consolidate but positive momentum remains continue with stocks specific action. In the coming trading session if nifty trades above 24730 level, then it may test 24780 – 24850 levels. On the downside 24630 – 24550 levels may act as support for the day.

Since prices are trading above the 50-days SMA, one needs to adopt a cautiously positive approach at current level.
