## Market Technical Outlook

The Nifty opened higher but could not sustain the opening gains and selling during the day led nifty to close in red. On the daily chart, we are observing that prices almost tested the 10-days SMA (23432) by making a low of 23443 and has formed a candlestick pattern that resembles a bullish “Hammer”. The said pattern will get activated if nifty trades and close above 23694. In such scenario nifty may test 23750 to 23840 levels in couple of days. On the downside, 23440 -23360 levels may act as support for the day.

Broadly, we are of the opinion that 23432 – 23294 is major support for nifty from where buy is likely to emerge. Hence, one needs to adopt cautiously positive approach at current level.
