Market Technical Outlook

The Nifty opened down and traded with negative bias throughout the day. On the daily chart, we are observing two consecutive "Narrow range body formation", which indicates we can see some consolidate but stocks specific action will remain continue. In the coming trading session if nifty trades above 24660 level, then it may test 24750 – 24830 levels. On the downside 24580 – 24530 levels may act as support for the day.

Since prices are trading above the 50-days SMA, one needs to adopt a cautiously positive approach at current level.
