Market Technical Outlook

The Nifty opened lower and momentum on the downside intensified as the day progressed which led nifty to close deep in red. On the daily chart, we are observing that prices have closed well below crucial support 23300 level. This gives small clue that the prior bottom of 22786 is under threat. In coming trading session if nifty trades below 23000 then it is likely to test 22960 - 22880 levels. On the upside, 23160 -23280 levels may act as resistance for the day.

Broadly, looking at the current price action it is evident that the prior bottom is under threat. Hence, one needs to adopt cautious approach at current level.
