Market Technical Outlook

The Nifty opened lower but witness smart recovery during the day to close in green. On the daily chart we are observing that prices have taken support at 10-days SMA (22381). This suggests that 22381 remains a make or break level going ahead. In coming trading session if nifty trades above 22522 then it is likely to test 22610 – 22730 levels. On the downside, 22390 – 22270 levels may act as support for the day.

Broadly, the 10-days SMA (22386) is crucial support for market. As long as nifty holds the mentioned level there is high probability that nifty may test 22800 – 23000 levels in couple of weeks. Hence, one needs to adopt cautiously positive approach at current level.
