Market Technical Outlook

The Nifty opened lower amid escalating geopolitical tensions with Pakistan, reflecting investor caution. Although the index managed to recover some intraday losses, it ultimately closed in negative territory. On the daily chart, we are observing prices have close below the 200-days SMA (24044) which is sign of weakness. In coming trading session if nifty trades below 23950 level then it may test 23900 – 23780 levels. On the upside, 24120 - 24245 levels may act as resistance for the day.

Broadly, looking at the current price action and the index's position below the 200-day SMA, it is prudent to maintain a cautious stance. Traders are advised to wait for clarity on geopolitical developments before initiating aggressive positions.
