### Market Technical Outlook

The Nifty opened down but as the day progressed, we witnessed smart recovery from lower level. On the daily chart, we are observing a "Trendline Breakout", which indicates we can see positive momentum with stocks specific action. In the coming trading session if nifty trades above 24780 level, then it may test 24880 – 24950 levels. On the downside 24700 – 24650 levels may act as support for the day.

Since prices are trading above the 50-days SMA, one needs to adopt a cautiously positive approach at current level.
