Market Technical Outlook

The Nifty opened on a subdued note, traded with negative bias throughout the day to close in red. On the daily chart, we are observing a narrow range body formation which suggests that markets are circumspect at current level. In coming trading session if nifty trades above 24720 level then it may test 24770 – 24850 levels. On the downside, 24550 – 24430 levels may act support for the day.

Since, prices are trading above the rising 200-days SMA (23790) & falling 50-days SMA (24400), one needs to adopt cautiously positive approach at current level.
