The Nifty opened on a subdued note but momentum on the upside intensified as the day progressed which led nifty to close on a strong note. On the daily chart, we are observing a bull candle with higher volumes this suggests that momentum on the upside is likely to continue. In coming trading session if nifty trades above 23890 levels then it may test 23960 – 24080 levels. On the downside, 23740 - 23630 levels may act as support for the day.

Broadly looking at the current price action we are of the opinion that 24050 is major resistance for the market. Any daily close above the mentioned level would propel the upside momentum and nifty may test 24300 – 24500 levels in couple of weeks. Hence one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
