Market Technical Outlook

The Nifty opened lower, traded with negative bias throughout the day to close in red. On the daily chart, we are observing five consecutive narrow range body formation this suggests indecisiveness prevailing at current level. In coming trading session if nifty trades above 22820 then it may test 22890 - 22960 levels. On the downside, 22682 – 22560 levels may act as support for the day.

We still maintain our stance that nifty needs to close above 22974 then only nifty is likely to test 23180 – 23250 levels in couple days. Hence, cautiously positive approach should be adopted at current level.
