#### **Market Technical Outlook**

The Nifty index commenced the session on a positive note and traded within a narrow range, eventually closing in the green. On the daily chart we are observing a narrow range body formation which suggests indecisiveness prevailing at current level. Further, prices are trading well above the 10-day Simple Moving Average (SMA) at 24,823 and continues to trade well above the 20-day SMA at 24,575, indicating sustained upward momentum. In coming trading session if nifty trades above 25050 levels then it may test 25120 – 25235 levels. On the downside,24900 – 24800 levels may act as support for the day. We continue to maintain our stance that broader context, prices remain firmly above key moving averages the 10-day, 20-day, and also the 200-day SMA at 24,052, reinforcing the underlying bullish trend. However, it is worth noting the presence of a negative divergence in the Relative Strength Index (RSI), which calls for a cautious approach in the near term, as it may signal slowing momentum despite the overall positive structure.
