## Market Technical Outlook

The Nifty opened higher traded in a narrow range with positive bias to close in green. On the daily chart, we are observing four consecutive narrow range body formations which suggests that markets are circumspect at current level. In coming trading session if nifty trades above 23865 then it may test 23930 – 24050 levels. On the downside, 23700 – 23590 levels may act as support for the day.

At present, prices are still trading below rising 200-days SMA (23862) & below the falling 50-days SMA (24223), one needs to adopt cautiously positive approach at current level.
